PROFESSIONAL SUMMARY

Junior Frontend Developer specializing in React and TypeScript, with hands-on experience building production-grade fintech and e-learning web applications. Strong in state management with Redux, API integration, and designing predictable, system-oriented frontend architectures. Comfortable owning features end-to-end, collaborating in PR-driven teams, and delivering responsive, performance-focused user interfaces

TECHNICAL SKILLS

Frontend

React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

API & System Integration

REST APIs, authentication flows (JWT), role-based access control, error handling

Core Concepts

Component architecture, API integration, responsive design, accessibility, performance optimization

Soft Skills

Problem solving, communication, teamwork, adaptability

State & Data

Redux, Zustand, TanStack Query, Axios

Tools

Git, GitHub, Firebase, Figma, Chrome DevTools, Vercel

Testing

- Jest
- Vitest
- React Testing Library
- Cypress (end-to-end testing)
- Component and feature-level testing

EXPERIENCE

Frontend Engineer (Engineering Program)

Rise Academy (RiseVest)

01/2025 – 12/2025

Lagos, Nigeria

- Designed frontend systems with clear data flow boundaries, reducing side effects and state
- Applied Redux and Zustand for predictable global state management across complex user flows.
- Owned frontend features end-to-end, from requirements breakdown to implementation and deployment.
- Collaborated in team-based environments using Git workflows, pull requests, and structured code reviews.
- Integrated REST APIs, handled async data with TanStack Query, and optimized client-side performance.

IoT Research & Testing Intern (Remote)

MIDROHUB

02/2024 – 01/2025

Remote

- Researched and tested MQTT and CoAP protocols, documenting performance and reliability trade-offs.
- Diagnosed hardware-software integration issues and produced actionable debugging documentation.

Freelance Frontend Developer

Freelance Frontend Developer

01/2023 – 07/2023

Remote

- Built responsive React web interfaces using a mobile-first approach.

- Integrated REST APIs and implemented error handling for maintainable, scalable codebases.

PROJECTS

Gbese - Peer-to-Peer Credit Transfer Platform (Capstone Project)

Tech: React, Redux, Tailwind CSS, shadcn/ui, TanStack Query

- Engineered core debt-transfer workflows ensuring real-time synchronization of wallet balances, debt records, and credit scores across users.
- Prevented financial inconsistencies by validating transaction parameters before state mutations and API calls.
- Collaborated in a 3-person frontend team using feature-based branching, pull-request reviews, and sprint stand-ups.
- Shipped a production-ready fintech interface used in live capstone demos and evaluations.

Live: <https://gbese-pi.vercel.app> 

GitHub: <https://github.com/Susu-spec/gbese> 

MultiLearn - E-Learning Platform (Solo Project)

Tech: React, TypeScript, Tailwind CSS, Zustand, Firebase, TanStack Query

- Designed and built a full-featured learning platform with authentication, role-based dashboards, and instructor approval workflows.
- Implemented full CRUD functionality for course creation and management.
- Improved page responsiveness and data fetching efficiency using TanStack Query caching strategies.
- Created a reusable component system with consistent light/dark theming across the application.

GitHub: <https://github.com/TrentonFunt/multi-learn> 

Stack Hero - Physics-Based Web Game

Tech: JavaScript (ES6+), HTML5 Canvas, CSS3, Web Audio API

- Built a physics-driven stacking game with collision detection, gravity simulation, and progressive difficulty scaling.
- Implemented game state management for scoring, combos, and level progression.
- Optimized input responsiveness and audiovisual feedback to improve gameplay smoothness.

EDUCATION

Rise Academy (RiseVest) – Frontend Engineering Program

2025

Rise Academy

Bachelor of Science in Systems Engineering

2024

University of Lagos

Lagos, Nigeria
